ProX T-10RSP24W 10U Space Shockproof Amp Rack ATA Flight Case 24" Depth W/Casters

Description

The **ProX T-10RSP24W** 10U Space vertical 24" deep, **Shockproof** amplifier rack case is the perfect storage solution for convenient security for a wide variety of amplifiers, pro DJ mixers, effects, and any other standard 19" width rack-mountable pro audio/DJ/Network gear.

Built with a heavy-duty construction design and dual mounting rails your equipment won't dislodge or slip, and strain on the rack ears will be minimized. These professional-grade products also include external spring-loaded handles and butterfly twist latches with included padlocks for added security. The hard rubber feet and walls will ensure maximum stability when on tour and stacking multiple units. As part of the ProX Cases Signature Series line of products, the T-10RSP24W case is assembled with thicker 3/8" plywood for premium protection. In addition to the heavy-duty design and convenient features of the T-10RSP24W, this case is coated with a beautiful black Honeycomb Digital™ finish giving you a stylish, durable, and dependable product that will last a lifetime.

This ProX ATA 300 Style Flight case is manufactured with the **Honeycomb Digital™** laminated surface design on 3/8" plywood. Made with the super-sleek look of Honeycomb Digital™ hexagon grids on all shell surfaces, which gives the cases an almost alien look! Also as opposed to regular laminated plywood cases from other manufacturers, the ProX Honeycomb Digital™ design helps prevent minor to mild scratches. The Honeycomb Digital™ line design was inspired in 2009 by the design of New York City Street Manhole covers which are made to handle rough and tough everyday punishment.

All ProX cases use CNC technology, during the manufacturing process, to assure that cases are consistently built with strict specifications and tolerances that are required for the high-quality standards that ProX cases have been known for since 1984.

Features

All ProX cases during the manufacturing process use CNC technology to assure all cases are consistently built with strict specifications that are required for the high-quality standards that ProX cases is known for since 1984.
