### ProX XS-12U4DTW 12U Shockproof Workstation Case with Dual Side Table and Drawers 24 In Rail to Rail

#### Description

The **ProX XS-12U4DTW** Workstation case with two side tables is your workshop on wheels. The XS-12U4DTW Workstation Case is constructed with our Signature Series Plywood, durable handles and pulls, and reinforced steel ball corners for years of on the road use. The Workstation boasts a black honeycomb laminated finish with a sharp, modern look that fits right in with a variety of environments.

This case features four, easy to open drawers and two side work tables to keep your gear organized and easily accessible for your professional events. The other side has a 12 Unit Rack Space that can be loaded from either side depending on your needs.

You have two different sizes of drawers to store a variety of DJ or sound reinforcement gear ranging from cables and connectors to some of your delicate electronics like wireless microphones. The heavy-duty drawers feature ball-bearing slides for long life in a variety of workload situations. A cover of the Workstation detaches and becomes a side work table allowing for a great space for event preparation or repair.

The **XS-12U4DTW Workstation** case is easily transported with the included four professional-grade casters for easy loading in and loading out at your events. The case also has recessed fold out handles on the sides for comfortable two people lifting.

This ProX ATA 300 Style Flight case/console is manufactured with the **Honeycomb Digital™** laminated surface design on 3/8" plywood. Made with the super-sleek look of Honeycomb Digital™ hexagon grids on all shell surfaces, which gives the cases an almost alien look! Also as opposed to regular laminated plywood cases from other manufacturers, the ProX Honeycomb Digital™ design helps prevent minor to mild scratches. The Honeycomb Digital™ line design was inspired in 2009 by the design of New York City Street Manhole covers which are made to handle rough and tough everyday punishment.
