ProX XCP-2CH-30 30 Deg. Cable Protector Corners 2 Channels

Description

This XCP-2CH-30 is a **2 channel 30degree angle corner cable protector**, keeping your wires covered and performing at their best, in corner angles! The strong, rubber material keeps wires from getting damaged by foot traffic and vehicles present in a busy work environment. The individual channels maintain organization and thorough protection for each wire. The interlocking ends permit use of multiple protectors in unison, facilitating wire coverage across long distances. The built-in handle makes it easy to construct pathways and re-arrange them according to your business needs. This protective cover is the top choice for indoor and outdoor events that require convenient and efficient coverage, such as live performances and mobile DJ setups.

Works with 2 Channel straight sections [XCP-2CH MK2](#)
