ProX XT-SQ328BLK 3.28ft - 1.00m F34 Segment Black Powder Coated | 2mm Wall

Description

The **ProX XT-SQ328BLK | 2mm Wall Truss** is one of the most trusted staging support systems in the industry and is built to the highest standards of safety and performance. It's a rugged and durable trussing solution perfect for live outdoor productions, nightclubs, and permanent installations. ProX XT Series Truss compares favorably to the other major trussing manufacturers. We manufacture with EN-AWT6 6082 Aluminum for safety and strength. Our XT series F34 square truss utilizes a standard conical connector system, which easily mates with other brands of the truss of the same size and connector type, and is available in a variety of lengths to suit your designs -- while our outstanding quality control and manufacturing techniques assure excellent fitment at every connection. ProX offers a wide variety of corners, base plates, connectors, and accessories that add stability while expanding on limitless design configurations.

Powder coating provides a stronger finish that is more resistant to damage than paint! Using a black powder coat truss is an effective way to add character to your truss designs. Powder-coated black aluminum ProX truss products provide an extra element that will help to personalize your truss display. Powder-coated finishes provide durability that reduces the risk of scratches, chipping, abrasions, corrosion, fading, and other wear issues.

ProX Goes Green - *Unlike many liquid paints, powder coatings offer a smaller carbon footprint which reduces the adverse effects on the environment. Powder coatings contain no solvents and release little or no amount of Volatile Organic Compounds (VOC) into the atmosphere!*

Always know your load weight for your equipment: VERY IMPORTANT - CLICK HERE**for Truss Loading Chart.**
