ProX X-8UE 8U Deluxe Effects Rack Case 14 In Deep Rail to Rail

Description

The **ProX X-8UE** effect rack offers the best protection available for professional audio equipment and DJ gear. Its 14" depth and dual rack rails make it perfectly suited for rack-mountable effects units, DJ filters and effects, signal processors such as compressors and EQs, and much more!

Whether you're on the road, in the air, or in the club, you know that your gear will be safe and secure. This is because each and every ProX case is ruggedly tested under the most stringent conditions to meet our state-of-the-art quality control standards. These professional-grade products also include external spring-loaded handles and butterfly twist latches. The rubber feet at the base will ensure maximum stability when stacking multiple units. The X-8UE case is assembled with 3/8" plywood for premium protection. In addition to the heavy-duty design and convenient features of the X-8UE, this case gives you a stylish, durable, and dependable product that will last a lifetime.

This **ProX ATA 300 Style Flight Case** is manufactured with the **Honeycomb Digital™** laminated surface design on 3/8" plywood. Made with the super-sleek look of Honeycomb Digital™ hexagon grids on all shell surfaces, which gives the cases an almost alien look! Also as opposed to regular laminated plywood cases from other manufacturers, the ProX Honeycomb Digital™ design helps prevent minor to mild scratches.

All ProX cases use CNC technology, during the manufacturing process, to assure that cases are consistently built with strict specifications and tolerances that are required for the high-quality standards that ProX cases have been known for since 1984.

Note: Any pictured device is shown for reference only and not included!
