### ProX X-BLITZZP10FT Blitzz Large Powder Cold Spark Effect Granules for Indoor or Outdoor Use Titanium Alloy Grains Effect Height: 3-10ft 1-3m

#### Description

The **ProX Composite Ti Stage Effect Powder** is a proprietary combination of Titanium and Zirconium. It contains no explosive content and is NOT conventional fireworks. The material produces a Cold Spark Effect at approximately 62 (sixty-two) degrees Fahrenheit (16.7 degrees Celsius)

The product is designed for use ONLY in the ProX Cold Spark Machine and must be used as directed in the equipment instruction manual. Always disconnect power when loading the machine. Keep a clear radius of 3 feet during operation.

Composition:

Chemical Name	% by weight	CAS No.	Dimensions	Molecular Formula
Titanium (Ti)	80	7440-67-7	180-300um	Ti
Zirconium (ZR)	20	7440-32-6		ZR

Note: Abbreviation CAS No. is Chemical Abstract Service Registry Number

Inside of each packet of granules is a safety scan card that must be scanned after granules are added and will provide a 15 minute run time of the machine. It is highly suggested that the machine is always empty when adding granules from a different package and scanning the safety card.

### Exterior Dimensions & Weight

Weight: 1.00 lbs

### Shipping Dimensions & Weight

Box 1 of 1: 5.00"H x 5.00"W x 5.00"L - Shipping Weight: 1.00 lbs
