### ProX X-DMX3CH Decoder Controller for DMX Driver Dimmer for DMX Devices and LED Lighting Strip Tape

#### Description

ProX X-DMX3CH Decoder Controller for DMX Driver Dimmer for DMX Devices and LED Lighting Strip Tape. This DMX decoder is an advanced lighting controller that uses a computer control chip to receive and convert international DMX-512 standard digital control signals into PWM controller signals to drive LED lights. With its ability to be controlled by a DMX Console and the capability of connecting to multiple DMX Decoders, it can increase the output power to achieve a wide variety of changing modes.

Additionally, this DMX decoder has the unique capability of being used as a synchronous controller to control LED lights alone, allowing for synchronized effects. It is designed with a digital tube that displays the address code and features three buttons for easier programming and setup.

Overall, this DMX decoder offers a comprehensive and versatile solution for lighting control, making it ideal for a wide range of applications, such as stage performances, events, and architectural lighting. Its advanced features, including its compatibility with DMX consoles and the ability to increase output power, make it a reliable and efficient choice for lighting professionals.

#### Features
