ProX XS-MIXDECK Flight Case for Numark MixDeck Quad Digital Controller

Description

The **ProX XS-MIXDECK** is the perfect companion for the state-of-the-art digital DJ. You should protect your investment and the XS-MIXDECK flight case will perform very well under all types of conditions. This case gives you peace of mind that your Numark Mixdeck equipment will be transported safely to its destination.

This ATA style 300 road-ready case is designed to protect the Numark Mixdeck or Mixdeck Quad, and it does the job well. The case is constructed with a rugged and durable Signature Series 3/8" Plywood, reinforced steel ball corners, as well as recessed steel padded handles and twist latches. There is additional space for cables and small accessories in the back of the unit for convenience, as well as a removable front panel for easy access to controls.

This ProX ATA 300 Style Road/Flight case is manufactured with the Honeycomb Digital™ laminated surface Design. Made with the super-sleek look of Honeycomb Digital™ hexagon grids on all shell surfaces, which gives the cases an almost alien look! Also as opposed to regular laminated plywood cases from other manufacturers, the ProX Honeycomb Digital™ design helps prevent minor to mild scratches. The Honeycomb Digital™ line design was inspired in 2009 by the design of New York City Street Manhole covers which are made to handle rough and tough everyday punishment.

All ProX cases use CNC technology, during the manufacturing process, to assure that cases are consistently built with strict specifications and tolerances that are required for the high-quality standards that ProX cases have been known for since 1984.

Note: Any pictured device is shown for reference only and not included!
