ProX XSQ-2848X6 MK2 Set of Six StageQ Platform Telescoping Legs 28 to 48 inch Height Adjustable Legs Only

Description

ProX **XSQ-2848X6 MK2 Set of Six StageQ Platform Telescoping Legs** 28 to 48 inch Height Adjustable **Legs Only**. Manufactured with 2" Tubing to fit in the StageQ™ platform pockets. All ProX XSQ portable stage decks are elevated or supported by either our standard fixed-height aluminum stage legs or our adjustable multi-height aluminum stage legs. Both style legs are manufactured from 2" aluminum tubing plus the adjustable legs have a larger diameter tube that fits outside the inner pipe for adjusting the height. The legs have a steel pin to secure the adjusting system and come with safety clips tethered on a stainless steel cable to prevent loss.

These adjustable legs offer good support and strength at an affordable price. Legs come standard with a 2-inch adjustable screw foot for fine leveling. Black rubber pad on the bottom so it will not mar or scratch any floor surface including gym floors. Stage Q portable stage decks in 4' x 4' and 4' x 8' use 4 legs for each section.

Adjustable stage legs are most often used in outdoor applications on unlevel terrain to quickly level your portable stage. They are also used indoors or on level surfaces and give you the flexibility of having multiple heights while owning one just set of legs. Adjustable legs include an outer and an inner leg plus a pin and screw foot for adjusting. The inner leg that fits inside your leg socket is made from the same exact size pipe as our standard fixed-height legs. The outer pipe is the pipe that slides up and down for adjusting and has holes every 2" plus a 2" screw foot for fine leveling.

Features

- **ProX One Year (365 days) Limited Warranty**
- **Adjustable leveler is M16 thread bolt**
