ProX X-T770 TWISTER 770 Watts Water- Based Fog Machine W wireless RF Remote

Description

The Xstatic Pro Lighting XT-770 Twister 770 is equipped with new sophisticated technology including an advanced cast aluminum heater, high precision PCB design, ETS and RGBA LED lighting. The quiet high-quality pump, when combined with our ultra-efficient heater technology, contributes to the incredibly low fluid consumption of less than one liter per two hours of continuous fogging (at 30% output). High precision fan control can be achieved thanks to the durable twin fans and the Twister's digital control module. The high-quality bearings in the fans allow silent operation, making the machine ideal for use at noise-sensitive events. For a small degree of fine-tuning, and a perfect haze of fine particles is achieved and minimal residue ensures long-term reliability of sensitive lighting equipment. The Twister 770 is preferred by many top stages and studio professionals.
