### ProX T-16MRSS13ULT Universal 19 Rack-mount Mixer W-13U Top and 16U Front W-2 Side Work Tables

#### Description

This **ProX T-16MRSS13ULT** Universal 19 Rack-mount Mixer W-13U Top and 16U Front W-2 Side Work Tables has all the best features you are looking for in a world-class flight case: strength, durability, and reliability with flexible options and sizes for different applications.

This heavy-duty professional combo rack is 23" deep and features 16U front loading and 13U top loading rails for convenient security for a wide variety of pro-DJ mixers, amplifiers, effects, and any other standard 19" pro audio/DJ gear. Other design highlights include a large swinging rear door (for easy wiring) with a beveled cable hole for permanent or semi-permanent installation. It also includes two Recessed handles on either side of the case.

This case also includes a sliding Glide laptop shelf for digital DJs who need to have all their gear accessible at once.

Additionally, it includes two folding side tables (front & back cover) for an extra workspace!

This ProX ATA 300 Style Road/Flight case is manufactured with the **Honeycomb Digital™** laminated surface Design. Made with the super-sleek look of Honeycomb Digital™ hexagon grids on all shell surfaces, which gives the cases an almost alien look! Also as opposed to regular laminated plywood cases from other manufacturers, the ProX Honeycomb Digital™ design helps prevent minor to mild scratches. The Honeycomb Digital™ line design was inspired in 2009 by the design of New York City Street Manhole covers which are made to handle rough and tough everyday punishment.

*All ProX cases use CNC technology, during the manufacturing process, to assure that cases are consistently built with strict specifications and tolerances that are required for the high-quality standards that ProX cases have been known for since 1984.*
