ProX XS-LCD5570WX2 Universal Case for Flat Panel Monitor LED-LCD-Plasma TV Dual 55" to 70" Adjustable Flight Case W/4" Casters

Description

The **ProX XS-LCD5570WX2** is designed to protect and transport **Two 55" to 70"** LED-LCD-Plasma TV/Monitors and is constructed with our rugged signature 3/8" Gig-Ready Series Plywood, durable rubber wheels, reinforced steel ball corners, as well as recessed steel padded handles and latches. The ProX TV road cases help keep Plasma, LED, and LCD screens safe from damage during transportation. This Universal case has an adjustable sidewall to accommodate screens from 55" up to 70" in size. Locking heavy-duty caster wheels help to secure stability while loading and unloading electronics. Additional EVA foam padding helps secure TV in place while protecting the device from bumps and scratches. Exercise care when loading, unloading and rolling cases. Handles are retractable for better space utilization and loading.

What size does it fit exactly?

This case supports multiple sized TV's from **55" Models** 48"W x 28"H to **70" Models** 62"W x 36"H.

This ProX **ATA 300 Case** is manufactured with the **Honeycomb Digital™** Protective Finish on Laminated 3/8" plywood. Made with the super-sleek look of Honeycomb Digital™ hexagon grids on all shell surfaces, sets ProX apart from other manufacturers. The Honeycomb Digital™ design helps prevent minor to mild scratches. This unique design was inspired in 2009 by the design of New York City Street Manhole covers which are made to handle rough and tough everyday punishment.

All ProX cases use CNC technology, during the manufacturing process, to assure that cases are consistently built with strict specifications and tolerances that are required for the high-quality standards that ProX cases have been known for since 1984.

Note: Any pictured device is shown for reference only and not included!

Note: All cases from ProX are designed to protect your equipment from damage during normal use and handling.
