ProX XS-UXXLT MK2 Universal Flight Style Road Case for Medium Size DJ Controllers with Sliding Laptop Shelf

Description

ProX **XS-UXXLT MK2** Universal Flight Style Road Case for **Medium Size DJ Controllers** with Sliding Laptop Shelf. This Universal flight case is made universal for Medium size Digital DJ Controllers, and comes with a sufficient supply of high-density foam inserts to get that completely customized snug fit to protect your favorite DJ controller! This Signature Series flight case is made with the highest quality material and workmanship to give you the ultimate security for any sized controller. If you have a passion for your gear and want to keep it safe at all times, this case will perform at the highest level every time.

Interior Dims: 21.75"W x 13"D x 3"H + additional 3"H rear space

The Case and sliding Laptop Shelf is constructed with our rugged signature 3/8" Gig-Ready Series Plywood, reinforced steel ball corners for protection and easy stacking, and recessed steel padded handles and latches to protect them from damage during transport. There is additional space for cables and small accessories in the back and underneath the unit for convenience, as well as a removable front and back panels for you to access the front and rear controls, headphone & mic jacks, etc.

This ProX ATA 300 Style Road/Flight case is manufactured with the Honeycomb Digital™ laminated surface Design. Made with the super-sleek look of Honeycomb Digital™ hexagon grids on all shell surfaces, which gives the cases an almost alien look! Also as opposed to regular laminated plywood cases from other manufacturers, the ProX Honeycomb Digital™ design helps prevent minor to mild scratches. The Honeycomb Digital™ line design was inspired in 2009 by the design of New York City Street Manhole covers which are made to handle rough and tough everyday punishment.

For the safety of your equipment, do not attempt to transport with any gear stored on the sliding shelf and be aware that the shelf can be removed when slid out to its furthest point.

All ProX cases use CNC technology, during the manufacturing process, to assure that cases are consistently built with strict specifications and tolerances that are required for the high-quality standards that ProX cases have been known for since 1984. **Note: Any pictured device is shown for reference only and not included.**
