ProX Cases New Model: XS-DDJSZWLT

ATA 300 Rated Flight Case designed specifically
for the Pioneer DDJ-SZ Digital DJ Controller

Model: XS-DDJSZLT

MODEL: XS-DDJSZLTWBL

ProX Live Performance Gear has now added the latest model to our **GigReady™** line of controller cases for one of today's most popular digital DJ controllers, the Pioneer DDJ-SZ.

The ProX Cases **XS-DDJSZLTW** has re-enforced 3/8" plywood at its core, and comes laminated with our hexagonal "Honeycomb Digital" surface pattern (not offered by any other case manufacturer), which creates a uniquely stylish appearance. As in all our model cases, the XS-DDJSZ has options for having all **BLACKonBLACK™** Hardware, a Laptop Shelf, and Wheels.

Our ATA-300 Rated flight cases provide serious protection with heavy duty hardware like steel ball corners, spring mounted handles, and rugged twist latches. Thick, 80% recycled foam rubber padding and soft carpeting lines the interior offering your gear a clean, snug embrace. The angled removable front panels offer full access to the deck's front mounted controls and connections. And as always, we include plenty of room in back for cabling.

Professional grade protection for your gear that doesn't break the bank, **Honeycomb Digital™** flight cases are available now through your authorized **ProX Live Performance Gear Dealer**. New cases are now currently available for other popular controller models such as the **Pioneer DDJ-SZ, SX and SR**, or **Numark's NS7ii, NV, Mixdecks**, and many, many more!
